

SharePoint Services – for FREE!

SDPS is a Microsoft software assurance benefit, which is a pre-defined, paid service from Microsoft to plan an effective SharePoint upgrade or deployment. There are 3 programs available:

01. SharePoint 2010 Upgrade Planning

The SharePoint 2010 Upgrade Planning offer helps you to discover the value of upgrading and provides you with a customized migration plan for leveraging the business collaboration platform for the enterprise and the web.

What You Get:

- A comprehensive intro to SharePoint 2010
- A thorough understanding of upgrade process as it relates to a deployment
- An awareness of the upgrade 'costs' and benefits (immediate/future)
- The benefit of best practices, proven tools, and methodology for upgrading to 2010

02. SharePoint Deployment Planning

The SharePoint 2010 Deployment Planning offer helps you to plan an effective deployment of Microsoft SharePoint Server 2010 for your organization.

What You Get:

An integrated deployment plan that can help lower costs, optimize business productivity infrastructure and create a secure and well-managed collaborative infrastructure that supports several key capabilities of Microsoft SharePoint 2010:

- Sites
- Content
- Insights
- Communities
- Search
- Composites

03. SharePoint for Internet Sites

The SharePoint Internet Sites Planning offer provides you with a unified solution for managing your Web Content lifecycle.

What You Get:

A customized plan for deploying a unified solution for managing your Web Content lifecycle. Leveraging SharePoint allows you to:

- Establish a platform for your Web Content Management
- Increase IT Manageability and Efficiency of Web Solutions
- Simplify your Content Publication Lifecycle
