

Digital Asset Portal

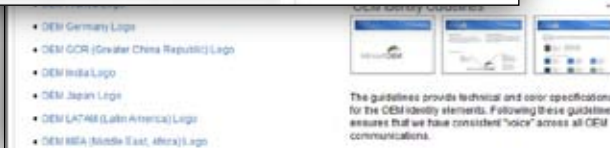

Home

2nd Level Page

<http://sharepoint/sites/oemcomms>

Challenge

- Make it easier to find, access and use brand assets + resources
- Decrease administrative time fulfilling email requests for assets + information

Our Role

- User interface configuration
- Web part development + integration
- Web content management

Impact

- Reduced email requests by creating a single repository housing all digital assets
- Increased content discoverability via intuitive architecture, repository consolidation + auto surfacing of assets using metadata tags

Technology

- SharePoint 2007
- SharePoint Designer 2007 (JavaScript, XML/XSLT)
